

## **Truck Classification Legend Definitions**

**Major Truck Streets:** A Major Truck Street is an arterial street that accommodates significant freight movement through the city, and to and from major freight traffic generators. The street is typically a designated principal arterial (see the “Planned Arterials Map” legend definition). Major Truck Streets generally carry heavier loads and higher truck volumes than other streets in the City. SDOT uses the designation of Major Truck Street on an on-going basis as an important criterion for street design, traffic management decisions and pavement design and repair.
